

NEW

SAC V-SERIES™ Classic Shootbolt Locking

The creative design team at Sac Systems Hardware Ltd, are excited to introduce a brand new Shootbolt Locking System. The system boasts eight independent locking points as standard regardless of window size! This can be up to twice as much as the competition. A patented new security feature called ASL® - which is a dovetail shaped shootbolt tip - designed to lock-out and engage stronger when a window is under attack.

In a world where home security is paramount and user expectation is high. Its the ultimate quick fix that can keep burglars out and user expectations satisfied . Combine this to great looks and great reliability, the product is a real winner when targeting for new business!

GFN Power-brace Steel Keeps

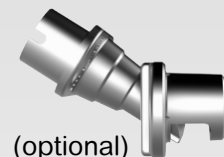

Another first from SAC® systems. SAC new V-SERIES™ GFN Power-brace keeps are security powered by super strong steel braces. Which are 30 times more resilient to breaking when compared to ordinary Zinc alloy keeps.

SAC ASL Bolt® and Keep

another first from SAC® Systems. Unlike competitor systems the SAC Bolt® and Keep hinge side security system incorporates patented new technology called ASL®. It's a fantastic new interlocking mechanism designed to lock-out and become stronger when a window is under burglar attack. Making friends with the burglar, isn't one of this products objectives!

Features At Glance

- independently tested by the BBA to 50,000 open and closing cycles
- resistance to salt spray - testing achieved Grade 3 on the BSEN1670 classification for high corrosion resistance (96 hours plus of corrosion resistance)
- patented new design ASL® (Anti Slip and Lock) design with up to 300% more shootbolt contact area (thickness)
- superglide gearing technology™
- 6 point locking as standard on all opening windows (regardless of size) with built-in night vent feature also as standard
- new high security GFN Power-brace Steel keeps. (30 times stronger than ordinary Zinc alloy keeps).
- designed to conform to all British and European standards
- shootbolt mechanism can also be upgraded to new patented Ant-Hike Technology™ - (unique only to SAC V-SERIES™ locking systems) Ask for further details .
